OneAI

UNIFIED ENTERPRISE AI

One workspace your company owns, with the models your teams already want: OpenAI, Claude, Gemini, DeepSeek, and others. It runs only for you, on your servers or isolated on ours.

- Centralized dashboard
- One budget for everyone
- Latest models on release
- On-prem, or isolated hosting

01 · CONTROL

Data stays with you

Installed on your servers. We maintain it. Or an isolated instance on our servers, never shared with another company. ZDR: data is not stored for model training.

02 · BUDGET

One invoice for all

Pay once per month for every employee. No individual AI stipends that are hard to track or reconcile.

03 · CAPACITY

Latest models, fast

Use OpenAI, Claude, Gemini, DeepSeek, and other models as they launch. Admins choose which ones each team can access.

WHAT YOUR TEAM CAN DO

Ask your files
Upload in the chat, ask, and follow up in the same thread.

Shared knowledge
Upload files once, share with the team, and tell the model to use them. No re-upload.

Create/Edit Documents
Word, PowerPoint, Excel, or PDF. Type the brief, then download.

Run code
Python or JavaScript for scraping, a site POC, or charts. Review what it ran.

Web search
On for the live web. Off, and the model stays at its knowledge cutoff.

PII Handling
National ID, email, and more. Detect, redact, or block.

Budget
Cap by provider, key, model, org, team, or user: cost, tokens, or requests.

Multiple Providers
Connect the providers you already use. One workspace.

PLATFORM · UP TO 40 USERS

Built for your company

Commercial terms tailored to your rollout

On-prem install (we maintain it) or isolated managed server, onboarding, monthly reports, and shared AI capacity. Custom SSO scoped separately.

COMPARE

Individual AI stipends usually fail

- Usage cannot be verified
- Funds may not be spent on AI
- Extra admin overhead, higher cost
- No centralized control

ONEAI · COMPARISON

WHY A CHATGPT SEAT IS NOT THE SAME PRODUCT

ChatGPT seats cost less for small teams. Choose OneAI for control, multiple models, one budget across providers, and data that stays with you.

NOT FOR YOU IF

Fewer than 20 people with chat-only needs

ChatGPT Plus or Business is usually enough and cheaper. OneAI is not meant to replace personal subscriptions at that scale.

GOOD FIT IF

20-40 people who need one platform

One platform for up to 40 users, with shared capacity across providers, on-prem or isolated hosting, and multi-model access.

CAPABILITY COMPARISON

	Individual stipends	ChatGPT Business	OneAI
Usage across providers	No	Included in ChatGPT	**Shared budget**
Single invoice & reports	No	ChatGPT only	**Yes · all models**
Admin chooses models	No	OpenAI only	**Yes · all vendors**
Multi-model	Depends	OpenAI only	**Yes**
Zero Data Retention	No	No training · not ZDR	**Yes**
On-prem or isolated host	No	Vendor cloud	**Yes**
Knowledge, files, code	No	Yes · ChatGPT	**Yes · all models**
Support in Indonesia	No	Overseas queue	**Yes · Jakarta team**

Capability notes: availability and commercial terms can change. Contact each provider for current terms.

SUPPORT IN INDONESIA

If your company is in Indonesia, we are already next door

Same timezone, Bahasa Indonesia, and on-site when it matters. Support from companies like OpenAI will never feel like that.

Stipends often don't become AI

Money in employee accounts can be spent on anything. No reporting, no audit, no policy.

A seat is not the product

Choose the platform when your company needs control across vendors, not simply a chat subscription.

ChatGPT already has files and code

Knowledge, files, code, and admin controls are in ChatGPT Business. OneAI adds multi-model, on-prem, and one budget across vendors.
